

Project name	Paper Mill
Country	Japan
Application	Process Water
Flow rate	150-170 m ³ /h ; 660-748 USgpm
Filtration degree	7 micron
Water source	Recycled waste water
Filtration solution	2 x AMF ² -370K
Installation date	1996

The AMF²370K filter replaced the cartridge filters and successfully removed fine carbon particles & fine fibers for recycled water to showers. By replacing the cartridge filter with the AMF²370K filter operating costs were reduced dramatically and total savings were: 200 Yen/m³ x 150m³/h x 24 x 30 days/month = 21.6 million Yen/month.
